*This will do. work, radical ideas distribution of internet platforms how the use of the media radicalization in the process the impact and this of the process social, political and cultural contexts analysis Also, the internet and Media through being distributed radical ideas and their social consequences thoughts about Research results, radicalization prevent to take for effective strategies working on the way out help to give possible.*

**Key words:** *Islam religion, Radicalization, Internet, Mass information Media, Age generation, Information distribution, Radical Ideas, Social consequences, Analysis, Strategies.*

**Login.** World along Islam religion of ideas radicalization, recent in years many countries and societies for serious danger giving birth problem as attention to the center Radicalization is falling. process not only religious extremism to strengthen, but social also threatens stability under puts. Such in the situation, the internet and public information of tools role separately importance The Internet, its wide prevalence and fast information exchange opportunities with, radical ideas distribution for comfortable to the platform turned into. Age generation, especially the internet active users is, their idea and their views in formation this tools important role plays.

Public information tools and radical ideas legitimize or to them against fight for strong tool as service to do possible. Media through being distributed information, news and analyses, society radicalization to the process impact to show However, the media targeted or unclear there is also an effect is, this in process their social responsibility and also take into account the role to take This research is necessary, Islamic religion of ideas radicalization through the internet and The media how role playing to study Research within the framework of, on internet platforms being distributed radical ideas, their spread mechanisms and The media this in process place analysis Also, radicalization process social, political and cultural See also contexts This is research results, radicalization prevent to take for effective strategies working on the way out help to give possible.

Radicalization process complexity and many edged nature, it to study further current The Internet and The media role and this the process further deeper to understand opportunity Research during radicalization social also consider the consequences is taken. Age generation radical to ideas relatively how in a relationship to be, their information to take methods and on the internet activity their conduct this in process important importance has.

This entrance in part radicalization process main aspects and of the research goals marked. Next in chapters, internet and The media radicalization role in detail analysis will be done and this to issues related there is theories seeing It is also possible that radicalization prevent to take for offer attainable strategies are also discussed.

This research is not only scientific public for, maybe political scientists, psychologists and social researchers also useful for to be is expected.

#### Radicalization process

Radicalization is person or of the group extremist ideas acceptance to do and this ideas in practice to apply ready to be This process is one how many from stages consists of to be possible:

1.Social isolation: Radicalization process often social insulation with This usually begins with a certain group or subculture inside himself to feel alone, to be alone thoughts others with share from not seeing come comes out.

2.Religious or ideological Influence: Religious extremism or radical ideologies acceptance to do, person thoughts in formation important role plays. This effect often religious leaders, extremist groups or via the internet done is increased.

3.To the group Joining: Radicalization in the process individuals often extremist to groups These groups, their in turn, his members radical ideas with fills and them to move encourages.

4. To practice transition: Finally, radicalized individuals own ideas in practice to apply ready This is often violent. or to terrorism take arrival possible.

#### The Internet role

Internet radicalization in the process following roads through impact shows:

1.Information distribution: via the Internet radical ideas quickly and wide Social networks, forums and blogs through extremist materials ease with will be found and share is seen.

2.Mutual connections: Internet, also radical groups between connections to install help gives. Through this they own ideas promote to do and new members attraction to do to the possibility has they will be.

3.Religious and ideological influence: on the Internet there is was religious and ideological materials, individuals thoughts in formation strong impact to show These materials are possible. often radical ideas legitimizes and them to the public presented will reach.

4.Age generation attraction To do: Youth of the internet active users are, they are radical to ideas relatively very sensitive. via the Internet to them being delivered ideas, their thoughts quickly change possible.

#### Public information of tools role

Public information radicalization in the media in the process important role plays:

1.Information distribution: media through radical ideas about information distribution It is possible. However, this information sometimes wrong or biased to be possible.

2.Stereotypes and stigmatization: media sometimes religious or ethnic groups stigmatization does this and radicalization process strengthen possible.

3.Analysis and Explanation: Media radical ideas and their social consequences about analysis and comments to give through society aware does.

4.Social responsibility: media, as well as social sense of responsibility They need. radical to ideas against fight for positive materials distribution possible.

#### Radicalization prevent to take strategies

Radicalization process prevent to take for one row strategies working can be output:

1. Education and Enlightenment: Age generation radical from ideas protection to do for education system strengthen necessary. Religious and cultural to the reasons based education to give important.

2. Social Integration: Social insulation reduce and various groups between communication develop necessary.

3. The Internet control to do: on the Internet radical ideas distribution prevent to take for special programs and platforms create need.

4. Media Responsibility: To the media radical to ideas against in the fight help to give for to them information right presented to grow according to recommendations to give necessary.

**Conclusion:** Radicalization process complicated and many edged is, the internet and public information tools this in process important role plays. This research, radicalization process understanding and him/her prevent to take for effective strategies working to go out help to give expected. Radicalization prevent to take for education, social integration and The media responsible approach important importance has.
